ERHARDT

Who we are

In 2020, we celebrated 40 years of Erhardt – a true milestone. What started as a small company in Burtenbach, a little town in Bavaria, has now grown into an enterprise employing more than 250 people. Erhardt is a real all-rounder in sun protection with a product portfolio that covers balcony and terrace awnings, fully equipped terrace roofs and slat roofs. All our products can be supplied with many optional features including lighting, heaters and automatic sun shades.

When it joined the Stella Group, Erhardt embarked on a new path towards a digital future. We are focused on our core expertise as a full-line provider of customised sun protection and outdoor living solutions, delivering premium quality made in Germany.

Erhardt is synonymous with a solution-based approach and individual support for our specialist partners. Our collaboration on equal terms ensures mutual success. We respect the identity of our specialist partners, at the same time strengthening their regional presence.

A full-line provider of products for customised sun protection and outdoor living solutions

Erhardt has the perfect sun protection for every situation – whether for the terrace, garden or balcony. The company offers professional tailor-made solutions in premium quality to improve your quality of life and create an entirely new sense of well-being under your awning, terrace roof or slat roof.

With our many years of experience in producing terrace roofs and awnings, we are experts in the planning and design of awnings and glass roofs. We are continuously adding innovative products to our portfolio. An awning is not just a sun protection system but a design element that needs to be integrated perfectly into a home's surroundings.

Our awning materials undergo strict quality controls at the weaving mill and in our in-house sewing shop. We offer more than 300 different fabric designs grouped into various collections. The adhesive bonding technique used in fabric production ensures high-quality processing.

Today more than ever, the focus is on the design and function of awnings and terrace roofs.

ERHARDT QUBE SKYLINE

The slat roof for a stylish experience

With our broad range of bioclimatic slat roofs, we are setting new standards in outdoor living. Erhardt slat roofs not only provide protection from the sun and rain, they also create an ambiance that makes your outdoor space an elegant and exclusive place to relax – transforming it into your favourite place to be. The Erhardt QUBE Skyline allows the roof to be retracted fully, giving you an uninterrupted view of the sky whenever you want.

We are your reliable partner with an extensive range of bioclimatic slat roofs, from standard solutions to high-end models for the optimum design of your outdoor space.

Erhardt Qube Skyline

Your advantages at a glance

Give your outdoor space a modern and elegant look with a touch of luxury and style – the Erhardt Qube Skyline enables you to experience a new kind of outdoor living.

- » You can retract the roof fully for an uninterrupted view of the sky.
- » Your exclusive place to relax can be customised to your individual needs with lighting, heaters, integrated vertical awnings for shade and many other modular options that can also be retrofitted at any time.
- » You gain additional living space for your hobby, leisure activities and time with your family by extending your outdoor living season with glass elements that protect you from the wind and the cold in your new outdoor living room.
- » The slat roof is configurable to fit your terrace so you don't have to make any compromises when it comes to the dimensions.

ERHARDT QUBE PLUS

The slat roof that offers so much more

With its many convincing options, the Erhardt Qube Plus satisfies your wishes without compromise. It is the largest slat roof in the Erhardt Qube range and can be expanded to a width of up to 7 m with an additional static post but without the need for a second module. The Erhardt Qube Plus takes outdoor living to a new level. You can choose from a broad range of additional features including various lighting options, integrated vertical awnings and Comfort slats.

Erhardt Qube Plus

Your advantages at a glance

The Erhardt Qube Plus not only offers protection from the sun and rain but creates a pleasant and comfortable atmosphere on your terrace thanks to the flexible adjustment of the slats.

- » The slats are adjustable to an angle of up to 140°, enabling you to control light and ventilation to suit your needs – for a pleasant and comfortable ambiance.
- » An additional static post makes it possible to create slat roofs up to 7 m wide – you don't have to compromise on the size of your roof.
- » You can design your exclusive refuge to suit your individual needs – our broad range of options such as various lighting solutions, heaters, integrated vertical awnings for shade and many other features satisfy your every wish and can also be retrofitted as modular add-ons – with absolutely no compromise.
- » You gain additional living space for your hobby, leisure activities and time with your family by extending your outdoor living season with glass elements that protect you from the wind and the cold in your new and exclusive favourite place.

ERHARDT QUBE 23

The slat roof with an aesthetic design

The roof's external appearance is characterised by its clean design with no visible screws. The slimline frame profile of just 23 cm gives the structure an elegant look. The slats move very quietly, ensuring undisturbed enjoyment of your outdoor space. They can also be adjusted quickly and individually. With a maximum angle of 175°, the direction of the opening is more or less irrelevant. The slats themselves have an attractive appearance.

Erhardt Qube 23

Your advantages at a glance

Your Erhardt Qube 23 allows the flexible control of light and shade on your terrace to suit your individual requirements. Enjoy the natural ventilation that only comes from a slat roof.

- » Experience the clean and solid design with no visible screws and enjoy the quiet movement of the slats – ensuring undisturbed enjoyment of your outdoor space.
- » The slats can be adjusted quickly and flexibly, enabling you to control light and ventilation to suit your needs – for a pleasant and comfortable ambiance.
- » Design your exclusive personal refuge to suit your own needs using our range of optional accessories such as lighting, heaters and shades.
- » You gain additional living space for your hobby, leisure activities and time with your family by extending your outdoor living season with glass elements that protect you from the wind and the cold in your new and exclusive favourite place.
- » The roof is configurable to the exact dimensions of your terrace without an additional quiver foundation.

Erhardt Qube 19

Your advantages at a glance

Now you can enjoy your garden even when the weather is bad – the Erhardt Qube 19 means you'll never be sitting in the rain but are protected by the easily closed slatted roof.

- » With a frame profile of 19 cm and post dimensions of 12 cm x 12 cm, the Qube 19 impresses with its slimline silhouette that is also perfect for smaller terraces.
- » Experience the clean design with no visible screws and enjoy the quiet movement of the slats – ensuring undisturbed enjoyment of your outdoor space.
- » The slats can be inclined up to 175° for ideal air circulation and are opened and shut by the fast and quiet mechanism to ensure a pleasant atmosphere on your terrace.
- » You can customise your refuge with our range of optional accessories such as lighting, heaters and many other features.
- » Make better use of your garden and extend your living space outdoors for your hobby, leisure activities and time with your family. Your new favourite place in your garden gives you and your family more room to grow.
- » The roof is configurable to the exact dimensions of your terrace without an additional quiver foundation.

ERHARDT TERRACE ROOF 150

Balancing style and function

The T150 is made from high-quality materials such as aluminium and glass that not only ensure high stability and a long service life but also provide a touch of elegance. Whether the sun is shining, it's pouring with rain or it's even snowing, this terrace roof provides reliable protection against the elements. You can use your terrace all year round and enjoy the comfort it provides. Best of all, you can configure your Erhardt terrace roof to suit your individual preferences and requirements, choosing from various designs to match your home perfectly. With an Erhardt terrace roof, you not only extend your outdoor living space but also create a wonderful atmosphere in which to relax and enjoy the good things of life.

ERHARDT TERRACE ROOF 100

Classic beauty and modern versatility

In spring, summer or autumn – an Erhardt terrace roof means you can enjoy the outdoors whatever the weather. The combination of perfect protection from the wind and rain, maximum comfort and almost unlimited design scope makes an Erhardt terrace roof the ideal extension to your living space. Thanks to planning and design flexibility and variety, an Erhardt terrace roof can be matched to all types of architecture and many different situations. Whether for a terrace, garden or balcony or as a custom solution, you decide which functions and protection you need. The wall connection system ensures maximum function and sealing of your terrace roof to provide reliable protection from the rain, snow and strong winds so you can use your terrace almost all year round.

Your advantages at a glance

- » Discover our Erhardt PM pergola awnings with zip function. This innovative awning fabric not only provides pleasant shade but a great many other advantages as well.
- » You will be impressed by our awnings' functional properties and their clean and elegant design. They integrate seamlessly into any living room or garden, adding a stylish look to the space.
- » You have the option of installing COB LED strip lighting in the cassette housing and/or guide rails for a pleasant ambiance. This, together with an optional heater, enables you to enjoy the evening hours under your pergola awning.
- » Vertical awnings are another optional feature of the Erhardt PM, ensuring privacy and protection from the sun so you can relax in your outdoor space.

ERHARDT K

The compact cassette awning for your terrace

Being able to relax and enjoy time on your own terrace or balcony makes an important contribution to your quality of life. The Erhardt K cassette awning provides maximum protection for your awning fabric and the entire arm mechanism which are retracted into the fully enclosed cassette. With a height of just 13 cm, the compact cassette awning is ideal for balconies and small terraces. It is the perfect choice if you want to ensure maximum protection for your awning fabric. The awning fabric and the entire arm mechanism are retracted into the fully enclosed cassette.

Erhardt K

Your advantages at a glance

- » The Erhardt K cassette protects the fabric and arm from the weather and offers ideal protection for any type of building.
- » The Erhardt K not only provides protection from the sun but enables you to design an individual and colourful living space. You can choose from a wide range of awning fabrics to add your personal touch.
- » Optional features for your awning include lighting and heaters. Operation is easy and Smart Home compatibility allows you to conveniently control your awning via an app.
- » The Erhardt K is especially suitable for balconies and small gardens, providing shade for an area of up to 16.5 m². The compact cassette is just 26.5 cm deep and 13 cm high.

ERHARDT S

The open folding arm awning for great flexibility

The Erhardt S is the ideal shade provider for mounting in a sheltered area such as below a balcony or roof overhang that protect the fabric and mechanism from the weather. The attractive design is timeless. You can choose from a range of options to configure your awning and create your favourite place on your terrace.

Erhardt S

Your advantages at a glance

- » The very slim drop profile makes it the ideal choice for small terraces and balconies. No matter how much space you have, the valance is the perfect fit and provides the shade you want.
- » The Variomatic drive enables you to adjust the inclination of the valance as desired. The valance can be adjusted flexibly to the angle you prefer.
- » The Erhardt S provides shade for areas of up to 18 m², enabling you to enjoy pleasant hours outdoors without being exposed to direct sunlight.
- » Our wide range of awning fabrics enables you to add colour and individual accents to your outdoor space. We have a large choice of colours and designs so you are sure to find the fabric that matches your own personal style.

Dimensions 600 x 300 cm (width x projection)
Inclination angle: 5° to 45°
With Variomatic: 5° to 55°

Control technology
Mechanism and crank, motor, optional remote control

Mounting
Ceiling, wall or rafter mounting

ERHARDT BS

The flexible open folding arm awning

If you want flexible protection from the sun that adapts to your individual needs, the Erhardt BS is the ideal solution. It can be mounted below a balcony or roof overhang, hung freely and exposed to all weathers or provide two levels of shade thanks to a Vario Valance. The Erhardt BS can be designed as an open folding arm awning for a sheltered area, hung in the open with an additional rain cover or installed as a fully enclosed system. It can be configured to suit your individual needs. The Erhardt BS Deluxe is additionally equipped with a Vario Valance to ensure optimum privacy and vertical protection from the sun. Like the main awning, this can be operated easily using a hand-held remote control (BS-D models upwards).

Dimensions

700 x 400 cm (width x projection)
Deluxe with Vario Valance 700 x 350 cm
Inclination angle: 5° to 40°

Control technology
Motor, mechanism and crank, optional remote control

Mounting
Wall, ceiling or rafter mounting

Erhardt BS

Your advantages at a glance

- » The Erhardt BS is the ideal solution for almost all types of structure. It is available in many different variants for modular configuration.
- » You not only have perfect protection from the sun but the wide range of awning fabrics enables you to customise your living space. You can choose from a wide range of colours to design an awning to suit your own taste.
- » The compact awning is just 15 cm high and blends harmoniously with the façade of your home. You can adjust the angle of inclination to achieve the amount of shade you prefer.
- » The sleeve variant provides full protection for both the fabric and the mechanism, despite its compact design. You can also add a Vario Valance for additional shade and privacy.
